Date of Birth: May 20, 2001

Profile Summary

AI-driven specialist with a strong foundation in Generative AI and Prompt Engineering, leveraging advanced tools like ChatGPT, Microsoft Copilot, and Gemini to automate tasks and optimize workflows. With a background in Computer Science, I apply AI solutions across digital marketing, content creation, project management, event coordination, and software sales, delivering innovative and data-driven results across multiple industries.

Education

Bachelor of Computer Science and Information Systems

Software Engineering Department, Mansoura University

Work Experience

Business Developer - Project Manager (Website Development)

July 2023 - Present

JPS Group (Startup)

- Led the rebranding of the company and contributed to market research and website analysis using AI tools to improve content and structure.
- Provided input for the redesigned website, offering strategic insights on branding, marketing, and expansion.
- Assisted with the financial and strategic evaluation of the company, setting investment and growth plans, and contributing to the development of the marketing and expansion strategies.

Project Manager & AI Coordinator

October 2023 - July 2024

Petmind (Under Establishment)

- Coordinated smart IoT solution development, using ChatGPT for team coordination, task management, and technical reporting.
- Conducted market research using AI tools like Gemini to gather insights, aiding strategic business decisions.
- Assisted in analyzing requirements for the smart solution, overcoming technical challenges, and managing complex projects using AI tools.

Event Manager

June 2023 - March 2024

Prime Events (Startup)

- Organized the 24th Graduation Ceremony for the Faculty of Computer Science and Information Systems, Mansoura University, using AI tools to assist in content creation, coordination, and team management.
- Managed administrative tasks using AI, including financial accounting and task delegation, significantly improving time management and team collaboration.

Digital Marketing & Software Engineer

November 2022 - June 2024

Green AgriNutrients Co.

- Specialized Prompt for Shipping Vessel Analysis: Developed an early ChatGPT prompt to compare shipping vessels, ports, and materials compatibility, an achievement in the early AI era.
- Content Automation: Automated routine content management tasks for the website, improving workflow efficiency and reducing manual work.
- GPT Development for Social Media: Created a custom GPT tool that automated social media content creation in both Arabic and English, including generating images based on content, dramatically reducing the need for a content writer and graphic designer while increasing productivity and engagement by 40%.

Event Coordinator & Marketing Team Member

February 2021 - October 2022

Arab Fertilizer Association

- Played a key role in organizing international conferences in Egypt and Algeria, supporting event planning and marketing.
- Assisted with media coverage and content creation, enhancing event visibility.
- Managed sponsorships and vendor coordination for smooth execution of large-scale events.

Skills

Generative AI & Technical Skills:

- ChatGPT (Paid Version)
- Microsoft Copilot (Paid Version)
- Gemini (Paid Version)
- GPTs Builder
- Prompt Engineering
- AI-Driven Automation
- Content Creation with AI
- MidJourney
- DALL-E
- AI-Powered Workflow Optimization
- Task Automation
- Data Analysis with AI

Project, Marketing & General Skills:

- AI-Powered Project Coordination
- Digital Marketing Strategy
- Market Research
- Social Media Management
- Event Planning & Coordination
- Software Sales
- Lead Generation
- Client Relationship Management
- Team Leadership & Collaboration
- Strategic Planning
- Time Management
- Financial & Resource Management

Achievements

- Specialized Prompt for Shipping Vessel Analysis (Green AgriNutrients Co.): Developed an early ChatGPT prompt to compare shipping vessels, ports, and materials compatibility, an achievement in the early AI era.
- Content Automation (Green AgriNutrients Co.): Automated routine content management tasks for the website, improving workflow efficiency and reducing manual work.
- GPT Development for Social Media (Green AgriNutrients Co.): Created a custom GPT tool that automated content creation in Arabic and English, generating images based on the content, reducing the need for a content writer and graphic designer while increasing productivity by 40%.
- AI-Powered Market Research & Team Management (Petmind): Used ChatGPT and Gemini for market research, managing team tasks, and analyzing technical requirements, contributing to smart solution development.
- AI-Powered Event Management (Prime Events): Leveraged AI tools to assist in marketing content creation, team coordination, and administrative tasks, improving event management efficiency.
- AI-Driven Website Redevelopment & Branding (JPS Group): Assisted in rebranding, market research, and providing strategic and financial analysis, contributing to the company’s future expansion and growth.

Objective

Seeking a challenging role where I can leverage my expertise in Generative AI, Prompt Engineering, and AI-powered project management to drive innovation and operational efficiency. Eager to apply my skills in using ChatGPT, Microsoft Copilot, Gemini, and other AI tools to contribute to the success of a forward-thinking organization.
